Re: Alarm.com Incorporated et al. v. ipDataTel, LLC
Civil Action No. 4:18-cv-02108 (S.D. Tex.)

Dear Chief Judge Rosenthal:

This letter supplements ipDataTel's recent supplemental briefing (Dkt. Nos. 126, 127, and 132).

Regarding the '276 patent, ipDataTel learned yesterday that on January 17, 2019, Plaintiffs submitted a "Certificate of Correction" to the Patent Office requesting that the claims of the '276 patent be altered such that the phrase "synchronization to associate" would be replaced with the phrase "an association to synchronize." Plaintiffs' purported basis for seeking this alteration is "applicant error." With this letter, ipDataTel submits Plaintiffs' Patent Office filings for the Court's reference. Exhibit A (attached hereto). As to the merits of Plaintiffs' request to the Patent Office, the request is fatally deficient in terms of meeting the requirements for correction based on applicant error. *See 35 U.S.C. § 255* (providing for correction "[w]henever a mistake of a clerical or typographical nature, or of minor character" is made, the "mistake occurred in good faith," and the "correction does not involve such changes in the patent as would constitute new matter or would require re-examination.").

Plaintiffs' requested correction of the phrase "synchronization to associate"—which the Court determined rendered the '276 patent invalid for indefiniteness (Dkt. No. 122)—amounts to an admission that the '276 patent should be dismissed from the case.

Further, Plaintiffs have indicated to ipDataTel that their preferred path forward regarding the '276 patent is for the Court to stay the present litigation as to the '276 patent until the Patent Office acts on Plaintiffs' request for correction. ipDataTel does not believe a stay would be appropriate for the reasons set forth above. Dismissal with prejudice, rather than a stay, is appropriate.

Chief Judge Lee H. Rosenthal
